

## A Revolutionary, Low-cost Approach to Power Control that:

**Hardens power grid.**

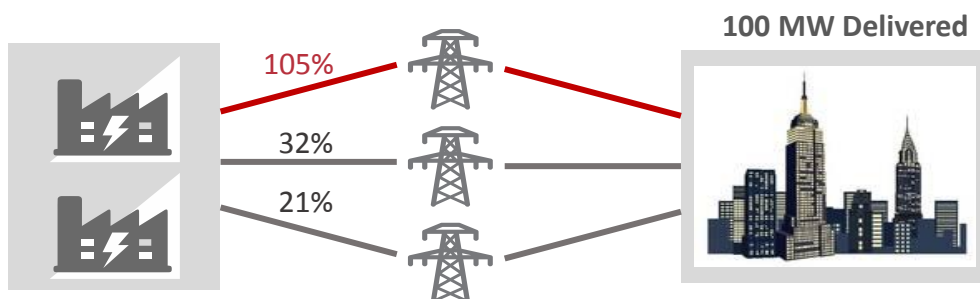

**Lowers energy costs.**

**Allows delivery of more power via existing lines.**

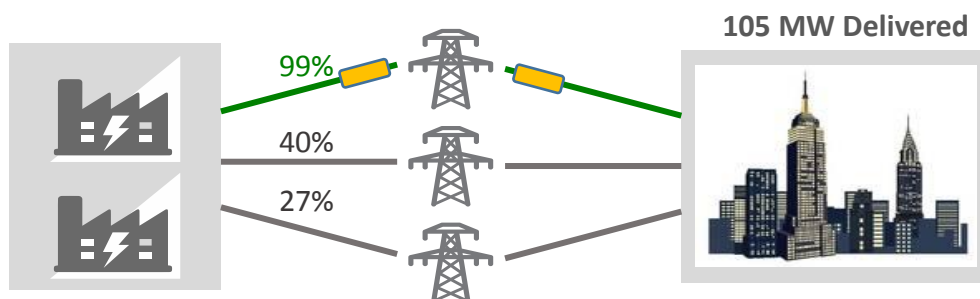

### Before SWG

Simplified planning scenario predicts future overload.

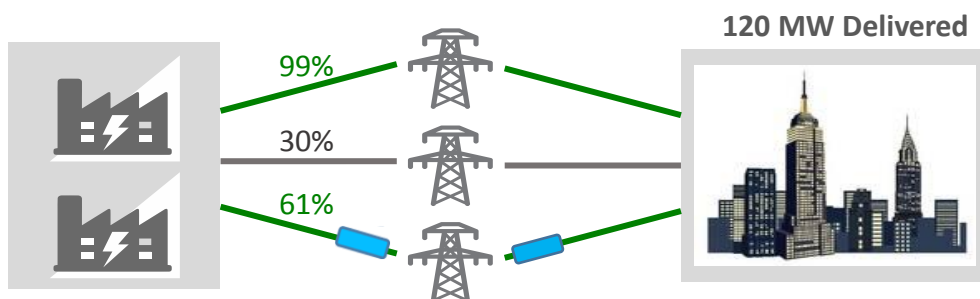

### With SWG's PowerLine Guardian (PLG)

Power is pushed to alternate lines with spare capacity, resolving overload.

### With SWG's PowerLine Router (PLR)

Power is pulled onto lines with spare capacity, resolving overload.
